Economic Contribution of the Forest Sector by NC Congressional District

Forestry plays a key role in the economy of North Carolina. North Carolina has over 18 million acres of timberland, which supports a robust forest products industry across the state. This [publication](#) breaks down how the forest sector contributed to the North Carolina economy in 2016, including employment, labor income, and more for North Carolina's 13 congressional districts. Take a look at this [article](#) to learn more.

Farm Bill 2018: Programs of Interest to Forest Landowners

The Congress passed the Agricultural Improvement Act of 2018, commonly known as the 2018 Farm Bill, in December 2018. This bill modifies and reauthorizes several agricultural and natural resource assistance programs for the next five years. In this [article](#), we present some of the forestry related programs and their updates in the 2018 Farm Bill that are relevant for forest landowners. Read on [here](#) to learn more.

Forest Carbon Offset Markets

Forest carbon is considered a forest product that can be a viable alternative source of income for forest landowners. This [publication](#) describes the forest carbon market today and explains the possible opportunity it represents for certain forests. For more information about this potential alternative income stream check out the [publication](#) and contact [our staff](#) with any questions.

Ecological & Social History of Shortleaf Pine

Shortleaf pine is the most widespread pine species in the Eastern United States, with a complex ecology and social history. In this [article](#) you'll learn about the historic range, ecology, and current condition of shortleaf pine forests and the historic and current human use of the species. Click here to access the [article](#).
