

FORESTRY

Woodland Owner Notes eNewsletter

September, 2018
New Look, More Information!

Mass Timber Products

Envisioned as a substitute for the traditional building materials of concrete, masonry, and steel, all forestry stakeholders have reason to be excited about these new timber products. The most widespread mass timber product is cross-laminated timber (CLT), which is currently on a rapid upward trajectory in North America. [Learn More](#)

Sustainable Forestry and Land Retention Project New Website

The website, www.recforestry.org, features a blog, offering a wide range of information on best practices in the sustainable forestry and natural resources industry. In the inaugural blog post, Program Manager Alton Perry discusses his forestry career and passion for sustainable forestry and land retention. He also offers his insights on the challenges of sustaining family owned forestlands and strategies for overcoming them.

Modular Wood Shed

This modular wood shed designed by the crafty Makah Nation tribe of Washington State is a simple design using average supplies and comes in under \$275 (depending on local lumber prices). It is a do-it-yourself project to tackle while the weather is still good and pays off this winter when stoking your fireplace or fire pit. The plans are available free thanks to the Burn Wise Program of the U.S. EPA. [See and print the plans here](#)

Forestry and Natural Resources Webinars

Webinars are a convenient way to learn about a wide range of topics from community forestry, to forest management, to wildlife. These free webinars are available live or archived "on demand." To participate all you need is a computer with an internet connection. You will find upcoming webinar listed below in the Coming Events section. [Learn More](#)
